
Android Analysis Report

Demo app
com.android.insecurebankv2

Date 2018-06-13

Contents

1	FINDINGS SUMMARY	1
2	DETAILED FINDINGS	3
2.1	A1: JavascriptInterfaceAnalyser	3
2.2	A2: MixedContentAnalyser	3
2.3	A3: Non-random XOR	3
2.4	A4:	4
2.5	A5: Electronic Codebook (ECB) used for encryption	4
2.6	A6: Application Data can be Backed up	5
2.7	A7: Activity (com. android. insecurebankv2. PostLogin) is not Protected. [an- droid:exported=true]	5
2.8	A8: Activity (com. android. insecurebankv2. DoTransfer) is not Protected. [an- droid:exported=true]	6
2.9	A9: Activity (com. android. insecurebankv2. ViewStatement) is not Protected. [android:exported=true]	6
2.10	A10: Content Provider (com. android. insecurebankv2. TrackUserContentProvider) is not Protected. [android:exported=true]	6
2.11	A11: Broadcast Receiver (com. android. insecurebankv2. MyBroadCastReceiver) is not Protected. [android:exported=true]	6
2.12	A12: Activity (com. android. insecurebankv2. ChangePassword) is not Protected. [android:exported=true]	7
2.13	A13:	7

1 FINDINGS SUMMARY

Index	Title	Impact
A1		Low
A2	Application Data can be Backed up	Medium
A3	Activity (com. android. insecurebankv2. PostLogin) is not Protected. [android:exported=true]	High
A4	Activity (com. android. insecurebankv2. DoTransfer) is not Protected. [android:exported=true]	High
A5	Activity (com. android. insecurebankv2. ViewStatement) is not Protected. [android:exported=true]	High

A6	Content Provider (com. android. insecurebankv2. TrackUserContentProvider) is not Protected. [android:exported=true]	High
A7	Broadcast Receiver (com. android. insecurebankv2. MyBroadCastReceiver) is not Protected. [android:exported=true]	High
A8	Activity (com. android. insecurebankv2. ChangePassword) is not Protected. [android:exported=true]	High
A9		Low

2 DETAILED FINDINGS

2.1 A1:

Recommendation

2.2 A2: Application Data can be Backed up

Description

This flag allows anyone to backup your application data via adb. It allows users who have enabled USB debugging to copy application data off of the device.

Recommendation

`android:allowBackup = False`

2.3 A3: Activity (com. android. insecurebankv2. PostLogin) is not Protected. [android:exported=true]

Description

A Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

Recommendation

It is recommended to set the protection level to signature, so only applications signed with the same certificate can obtain the permission.

2.4 A4: Activity (com. android. insecurebankv2. DoTransfer) is not Protected. [android:exported=true]

Description

A Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

Recommendation

It is recommended to set the protection level to signature, so only applications signed with the same certificate can obtain the permission.

2.5 A5: Activity (com. android. insecurebankv2. ViewStatement) is not Protected. [android:exported=true]

Description

A Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

Recommendation

It is recommended to set the protection level to signature, so only applications signed with the same certificate can obtain the permission.

2.6 A6: Content Provider (com. android. insecurebankv2. TrackUser-ContentProvider) is not Protected. [android:exported=true]

Description

A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

Recommendation

It is recommended to set the protection level to signature, so only applications signed with the same certificate can obtain the permission.

2.7 A7: Broadcast Receiver (com. android. insecurebankv2. MyBroadcastReceiver) is not Protected. [android:exported=true]

Description

A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

Recommendation

It is recommended to set the protection level to signature, so only applications signed with the same certificate can obtain the permission.

2.8 A8: Activity (com. android. insecurebankv2. ChangePassword) is not Protected. [android:exported=true]

Description

A Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

Recommendation

It is recommended to set the protection level to signature, so only applications signed with the same certificate can obtain the permission.
